Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals July - December) Mining techniques have evolved over time, culminating in the well-defined field of "mining science," which encompasses aspects such as engineering, chemistry, physics, technology, and management, among others. This book explains how mining techniques can be handled and improved further to make mining practices far more productive, safe, and eco-friendly. It is a useful resource for researchers, students, policy formulators, and decision-makers in different areas of mining and engineering. This book has two purposes. The first is clearly historical, the second is more philosophical and interpretive. Its success in the former will be less arguable than its attainment of the latter. The contribution to the history of Spanish letters consists in critically establishing the fact that the sources of Fray Luis de León's moral and spiritual thought are Hebraic and that he can be seen to stand as one in a long line of Christian Hebraists, both scholastic and humanist. His philosophical views are cast in an Hebraic tradition, not in an Hellenic one as supposed by nearly every other commentator. I have stressed the presence of a living Hebrew culture in Spain after 1492, and I have suggested that this and the Jewish parentage of Fray Luis are very significant. I have also identified an intellectual debt Fray Luis owed to non-Jewish Orientalists such as Egidio da Viterbo and Girolamo Seripando. But, even they learned from exiled Spaniards. I want to present Fray Luis as a most characteristic thinker in the world of Baroque Spain. I think most will agree with the picture I have outlined. The more audacious aspect is my wish to show the importance of the Jewish heritage as found in the literary and philosophical production of this

remarkable genius. It is, of course, my contention that today knowledge about Fray Luis and what he stood for is extraordinarily important. This volume constitutes the refereed proceedings of the 4th IFIP WG 5.4. Working Conference on Computer-Aided Innovation, CAI 2011, held in Strasbourg, France, in June/July 2011. The 14 revised papers presented were carefully reviewed and selected from numerous submissions. They cover a broad range of topics from basic research to industrial applications of computer-aided innovation systems. In this fourth edition of a social work standard, Leon Ginsberg and Julie Miller-Cribbs offer an updated version of the text that has introduced thousands of social work students to the defining policies and procedures of the profession. Concise yet comprehensive, the volume surveys the span of social welfare history, explains the elements of social welfare policy education, and describes the impact of executive, legislative, and judicial initiatives on the delivery of social services. This book assesses the state of the art of agent-based approaches as a software engineering paradigm. The 15 revised full papers presented together with an invited article were carefully selected from 43 submissions during two rounds of reviewing and improvement for the 4th International Workshop on Agent-Oriented Software Engineering, AOSE 2003, held in Melbourne, Australia, in July during AAMAS 2003. The papers address all current issues in the field of software agents and multi-agent systems relevant for software engineering; they are organized in topical sections on - modeling agents and multi-agent systems -methodologies and tools - patterns, architectures, and reuse - roles and organizations. This book is about a hotel full of animals. And an evil ice maker. And glass eyeballs -- oh, and really old panty hose and Possibly Fake Hair. But mostly, it's about Leon Zeisel and his epic quest to survive fourth grade, despite his teacher, Miss Hagmeyer, and his archenemy, Lumpkin the Pumpkin, a human tank with a deadly dodgeball throw. Luckily, Leon has friends who will stand by him even if his magical plans for rescue and revenge involve ... SPIT! Empower your students to become part of the solution. With a clear and upbeat voice, this thought-provoking overview of social problems challenges readers to understand and recognize social problems in their communities and inspires them to become part of the solution. The Fourth Edition of this popular book goes beyond the typical presentation of contemporary social problems and their consequences by emphasizing the importance and effectiveness of community involvement to achieve real solutions. With an overarching focus on social inequalities and policy, this proven text provides a platform for discussion that encourages critical thinking and inspires hope. The idea of devoting a complete book to this topic was born at one of the Workshops on Nonlinear and Turbulent Processes in Physics taking place regularly in Kiev. With the exception of E. D. Siggia and N. Ercolani, all authors of this volume were participants at the third of these workshops. All of them were acquainted with each other and with each other's work. Yet it seemed to be somewhat of a discovery that all of them were and are trying to understand the same problem - the problem of integrability of dynamical systems, primarily Hamiltonian ones with an infinite number of degrees of freedom. No doubt that they (or to be more exact, we) were led to this by the logical process of scientific evolution which often leads to independent, almost simultaneous discoveries. Integrable, or, more accurately, exactly solvable equations are essential to theoretical and mathematical physics. One could say that they constitute the "mathematical nucleus" of theoretical physics whose goal is to describe real classical or quantum systems. For example, the kinetic gas theory may be considered to be a theory of a system which is trivially integrable: the system of classical noninteracting particles. One of the main tasks of quantum electrodynamics is the development of a theory of an integrable perturbed quantum system, namely, noninteracting electromagnetic and electron-positron fields. First multi-year cumulation covers six years: 1965-70. The United States will no longer have a Caucasian majority in the second half of the 21st century. Evidence shows that misdiagnosis of mental disorders occurs more frequently in minority

populations. Thus, the domestic and international utility of DSM-IV and its companions will depend on their suitability for use with various cultures. A key feature of this volume is the collaboration of cultural experts, members of the National Institute of Mental Health (NIMH) Culture and Diagnosis Group, nosologists, and members of the DSM-IV Task Force and Work Groups. The NIMH and the American Psychiatric Association held a conference on Culture and Psychiatric Diagnosis to prepare for DSM-IV. Culture and Psychiatric Diagnosis developed from that meeting to enhance the cultural validity of DSM-IV. If clinicians are to become culturally sensitive, they must understand the criteria that define a disorder and consider the cultural context of the person being examined. They can then ascertain whether the criteria are applicable in the present cultural context of the patient. Culture and Psychiatric Diagnosis will benefit all clinicians treating minority patients because it documents and clarifies how cultural factors influence psychopathology; the manifestations, assessment, and course of mental disorders, and the response to treatment. So often, political science is introduced to students as a segmented field. The Challenge of Politics instead enables students to see how the subfields converge around a set of crucial questions: can we, as citizens and students articulate and defend a view of the good political life and its guiding political values? Can we develop a science of politics to help us understand significant political phenomena—the empirical realities of politics? Can we bring a high level of political prudence or wisdom to bear on judgments about politics and public issues? Can citizens and students creatively address the future of politics? Riemer, Simon, and Romance aim to harmonize the valuable lessons of classic and contemporary theory, as well as to reconcile politics to scientific and empirical study. The book gives students an avenue to explore the impact of philosophy and ideology, to recognize major forms of government, to evaluate empirical findings, and to understand how policy issues directly affect people's lives. Throughout, the authors look at political dynamics of American, comparative, and international affairs. While continuing to pursue its distinctive normative approach and showing politics to be a potentially humanizing enterprise, this new edition of Challenge has been revised and updated for major world events like the global financial crisis, recent elections in the U.S. and elsewhere, important policy decisions like the recent Supreme Court ruling in the U.S. on healthcare, and the aftermath of the Arab Spring. Based on reviewer feedback, it has also been substantially streamlined throughout. Social Work in Juvenile and Criminal Justice Systems sets the standard of care for mental health treatment and the delivery of social services to crime victims, juvenile and adult offenders, and their families. The chapters, all authored by experts in the field and all committed to the mission of social justice, are written with the clear understanding that we cannot study criminal justice in a vacuum. Therefore, a major focus of the book is on the renewed growing sense of the profession's obligation to social justice. Each chapter interconnects with the various components of juvenile and criminal justice. Another prominent aspect of the book is that it is strength-based. It views those involved in the criminal and juvenile justice systems as individuals rather than inmates or criminals, each with unique positive talents and abilities. The book is divided into four sections. The first section discusses forensic social work, including crime and delinquency theories, trends, and ethical issues. The second section prepares social workers for practice in correctional institutions and explores crisis intervention with victims of violence, reentry of adult offenders in society, and aging in prison. The third section covers assessment and intervention in child sexual abuse, mental health and substance abuse, interpersonal violence and prevention, child welfare and juvenile justice. The final section presents an overview on social work in the twenty-first century, which includes restorative justice and the justice system, new ways of delivering justice, domestic violence, neighborhood revitalization, race and ethnicity, and social work practice with LGBTQ offenders.

This book will be the best single source on social work in criminal justice settings and will prove to be an invaluable resource for the many professionals who have responsibility for formulating and carrying out the mandates of the criminal justice system. La familia de León was one of the foundation stones on which Texas was built. Martín de León and his wife Patricia de la Garza left a comfortable life in Mexico for the hardships and uncertainties of the Texas frontier in 1801. Together, they established family ranches in South Texas and, in 1824, the town of Victoria and the de León colony on the Guadalupe River (along with Stephen F. Austin's colony, the only completely successful colonization effort in Texas). They and their descendents survived and prospered under four governments, as the society in which they lived evolved from autocratic to republican and the economy from which they drew their livelihood changed from one of mercantile control to one characterized by capitalistic investments. Combining the storytelling flair of a novelist with a scholar's concern for the facts, Ana Carolina Castillo Crimm here recounts the history of three generations of the de León family. She follows Martín and Patricia from their beginnings in Mexico through the establishment of the family ranches in Texas and the founding of the de León colony and the town of Victoria. Then she details how, after Martín's death in 1834, Patricia and her children endured the Texas Revolution, exile in New Orleans and Mexico, expropriation of their lands, and, after returning to Texas, years of legal battles to regain their property. Representative of the experiences of many Tejanos whose stories have yet to be written, the history of the de León family is the story of the Tejano settlers of Texas. This book presents a schoolwide model of instructional support designed to make the most of available time, resources, and personnel—one that is also fully compatible with other problem-solving models, such as response to intervention. The authors provide a comprehensive and cohesive framework for linking assessment and intervention. They show how to interweave evidence-based instruction with targeted professional development and other components that support improved learning outcomes for all K-8 students. Helpful tables describe dozens of research-based assessments and interventions in reading, writing, and math. In a large-size format with lay-flat binding to facilitate photocopying, the volume includes more than 20 reproducible worksheets and forms. The companion website features additional reproducibles and supplemental materials for use in conjunction with the book. This book is in The Guilford Practical Intervention in the Schools Series. This book explores language teacher beliefs in English as a Foreign Language (EFL) reading instruction in the context of Chinese university English instructors. Since the 1990s, there has been a renewed interest on teacher beliefs in the domain of language teacher cognition. However, most studies in this area aim at investigating the relationship between particular aspects of teacher beliefs and classroom practices, largely ignoring the complexity of teacher beliefs. This study explores the issue from an alternative perspective by conceptualizing teacher beliefs as a complex, dynamic and multi-faceted system. By adopting five rounds of interview and four classroom observations, the year-long study reveals seven key features of the belief system shared among six participants. It calls for the holistic, complex and insider view to examine teacher beliefs in relation to the sociocultural and historical contexts where the teachers work and live.
