For the fourth time now, experts in tourism from various countries come to attend the ENTER conference in order to inform themselves and others about the current developments in the usage of information and communication technologies. The ENTER conference is thought as a platform for the exchange of ideas, experiences, opinions, and visions among scientists and practitioners. The visions presented at the last three ENTER conferences have triggered many requirements of important on-going and planned projects in the application of communication and information technologies in tourism. The scope of the papers of this proceedings covers the most recent and relevant to pics in our area of interest. The sessions are primarily devoted to intelligent agents and systems, the future role of global (reservation) systems, the new chances of data base

applications due to the most recent technological developments. and above all the role of the Internet (and Intranet). I would like to express my cordial thanks to all institutions actively supporting this event, namely: • The Edinburgh & Lothian Tourist Board • The International Federation of Information Technology in Tourism (IFITT) Several people spent numerous hours organizing the scientific programme of ENTER. The names of most of them will appear in the following pages. Join Jeff Evans as he guides you on outdoor adventures to the world's highest mountains and unpacks what it means to conquer the fear and peril that life's challenges bring. In this updated and expanded edition of MountainVision, Jeff's exciting and heartwarming memoir teaches new lessons in leadership and life from beyond the summit. Over twenty-five-plus years of guiding adventurer groups to the tallest peaks on six continents, Jeff has shown himself to be courageous, cool-headed, and committed to safety. As a co-founder of Soldiers to Summits, Jeff has trained and guided war veterans on some of their most daring exploits. As the friend and guide of blind adventurer Erik Weihenmayer, Jeff has done what no one else would, come alongside a man who needed someone special, as committed to Erik's safety as to his own, and to finding creative ways to give Erik the help he needed but also the empowerment he wanted. Now, as a motivational speaker around the world, Jeff inspires business, military and civic leaders with his lessons from beyond the summit, showing that learning the basics of leadership and management on a mountain top is only different from business in that there are fewer distractions, in fact there can be no distractions. As a certified emergency medical specialist, Jeff knows how to care for those he guides in perilous situations. And as a great leader, Jeff cares for the emotional and spiritual needs of his team as well, as they face true danger and the

ever-present concern that the next step could be the last. In *MountainVision*, Jeff's "tales from the trails" will take you to the Rockies and the Alaska Range, to Peru and Greenland, to the Atlas Mountains and Kilimanjaro in Africa, and of course, to Everest and Nepal. Along the way, there are adventures in Haiti and 10 weeks in Morocco on the TV series "Expedition Impossible," where Jeff, Erik and Ike finish ahead of 11 other teams, none of which included a blind guy. Jeff's easy style and thrilling storytelling will satisfy and delight readers of all ages. Come on and join his adventures to the world's rooftops, right from your most comfortable reading chair. On January 20, 2003, at 10:45 a.m., a massive avalanche in the Selkirk Range of British Columbia struck three members of two guided backcountry skiing groups and buried them. After a frantic hour of digging by those still standing, an unthinkable outcome became reality: seven people were dead. The tragedy made international news, splashing photos of the seven dead Canadian and US skiers on television screens and newspaper pages. The official analysis was that guide error was not a contributing factor in the accident. This interpretation was insufficient for some of the victims' families, the public and some members of the guiding community. Buried is the assistant guide's story. It renders an answerable truth about what happened by delving deep into the human factors that played into putting people in harm's way as well as the peace that comes from accountability and the personal growth that results from understanding. \* An eloquently written story, laced with appreciations of the region's natural history \* Includes historic photographs In midwinter 1920, Floyd Schmoie and his bride struggled up Mount Rainier on snowshoes on a long-delayed honeymoon. As the new caretakers at Paradise Inn, they would be alone in a towering world of snow and ice and incomparable beauty, until the plows arrived to free them on the fourth of July. So began a long love affair with Mount Rainier. And here is Floyd Schmoie's account of it; a delightful and informative portrait of a mountain through the seasons of the year. Through his personal narrative, Schmoie writes of many things that combined to cast a spell on him: the shy mountain goat, the reproductive processes of trees and plants, techniques of climbing, the habits of glaciers and volcanoes, the curious fact

of a mouse being found at very high altitude, the peculiarities of tourists-and much more. This is a book for anyone drawn to the mysteries of the high country. The Case of the Mountain's Monster is the tenth book in the Wolflock Cases teen fantasy mystery series. Between the frosty mountain, the unsavoury company, and his best friend's cold shoulder, Wolflock begins to realise that life is much harder alone, especially with a terrible monster that stalks the travellers every night. But when a sprinkling of clues links him back to the Silver Ice Hair and his journey to Mystentine, making Wolflock fear that the shadowy thread he's chased all the way here may now be chasing him. No one is safe and Wolflock needs help more than ever. Solve the last case in the Wolflock Cases: The Journey to Mystentine. Otherwise, the final steps in Wolflock's journey may be the last he ever takes. Conrad Kain's letters provide insights into the life and thoughts of this exemplary Austrian-Canadian mountaineer. Dream Season is the ultimate guide for anyone interested in heli-skiing, cat-skiing, or heli-boarding. This book allows you to relive the adventure of trips to Alaska, British Columbia, Colorado, New Zealand, and Russia. With extensive operator listings, Dream Season is the perfect tool to help plan your heliskiing, catskiing, or heliboarding vacation. When planning to ski deep powder with the luxury of a helicopter or snowcat, Dream Season will serve as your guide. In-depth reviews of the following destinations are included: Alaska, Argentina, British Columbia, California, Chile, Colorado, France, Georgia, Greenland, Idaho, India, Italy, Montana, Nepal, Nevada, New Zealand, Oregon, Russia, Sweden, Switzerland, Turkey, Utah, Washington, and Wyoming. Make this the year that you plan your Dream Season! [CLICK HERE](#) to download a sample from Everest 1953 In the only book to tell the real story of Everest 1953, Mick Conefrey reveals that what has gone down in history as a supremely well-planned attempt was in fact beset by crises -- both on and off the mountain. To succeed, team leader Colonel John Hunt and his team had to draw on unimaginable skill and determination, as well as sheer British ingenuity. Everest 1953 is not only a gripping true story of courage and adventure, but a fascinating window into the media contest to

cover this seminal event in coronation year. The Times had exclusive access to the team, but the Daily Mail and other papers used subterfuge and shenanigans to get their scoops. Revealing the answers to long-enduring controversies -- did Tenzing or Hillary actually reach the top first? -- and exploring the legacy of this great ascent, it is the perfect way to commemorate a year of British sporting triumph. Take the snowiest mountains in Canada, add two Austrian immigrants, an army of adrenaline-addicted skiers (kings, queens, billionaires, average people and everyday ski bums) and throw a helicopter into the mix for an unforgettable story of mountain adventure. The tale begins when two childhood friends-Hans Gmoser and Leo Grillmair-leave postwar Austria and travel to Canada in search of adventure. They stumble upon employment taking skiers across the vast glaciers and through the thick forests of Western Canada. When skiers start asking the immigrant mountaineers if it would be possible to use a helicopter to reach the best high-altitude powder, the two find themselves catapulted into a project brimming with more adventure, success, tragedy and fame than they could have dreamed. Complete with archival and contemporary photos, this is the inside story of the people, thrills, accidents and innovations behind the evolution of a sport from a dangerous, ramshackle and lawless enterprise into a multi-million dollar industry offering reliable access to one of the world's most exciting forms of recreation. Described as 'unforgettable' by The Mail on Sunday, A Hundred Million Years and a Day is a pocket-sized epic adventure story of a professor's journey to an Alpine glacier. 'Powerful' Sunday Times When he hears a story about a huge dinosaur fossil locked deep inside an Alpine glacier, university professor Stan finds a childhood dream reignited. Whatever it takes, he is determined to find the buried treasure. But Stan is no mountaineer and must rely on the help of old friend Umberto, who brings his eccentric young assistant, Peter, and cautious mountain guide Gio. Time is short: they must complete their expedition before winter sets in. As bonds are forged and tested on the mountainside, and the lines between determination and folly are blurred, the

hazardous quest for the Earth's lost creatures becomes a journey into Stan's own past. This breathless, heartbreaking epic-in-miniature speaks to the adventurer within us all. Provides information for non-profit organizations which sponsor vocational learning programs Mountain Lion (aka OS X 10.8) is now available, and thanks to the Mac App Store, the process of purchasing, obtaining, and installing Mac OS X is faster and easier than ever. Like Lion, getting this version of the OS no longer involves driving to the nearest Apple Store or retailer, or waiting for the FedEx truck to arrive. But the better shape your Mac is in before you install Mountain Lion, the better experience you'll have during and after the upgrade. Allow us to introduce the Mountain Lion Installation Guide. In this book, we cover the requirements for running Apple's newest OS; the things you should do to get your Mac ready; and the purchase and download processes. We walk you through the actual installation; recommend some post-install tasks; discuss some upgrade challenges; and help you decide if a "clean install" is for you. We've also got instructions for creating a bootable Mountain Lion installer disc or drive, as well as for installing Mountain Lion over Snow Leopard (Mac OS X 10.6). Mark the Mountain Guide is the first in a new series of books written by Mark Seaton, a mountain guide who lives and works in the European Alps. The book is endorsed by the International Mountain Guide Association and features an introduction by mountaineer Sir Chris Bonington. It's a beautiful morning at the Marmot Mountaineering School when an enormous avalanche blocks the path back to High Alp Village. How will the students ever get home? Join Mark and his friends on their exciting journey as they slide over Grumpy Gorge, trek across Sorbet Glacier and scale the Applestrudelhorn. The book features a play section, packed with facts and tips on safe mountaineering. Perfect for little adventurers! In 2008, historian Dave Phoenix decided to walk across Australia from Melbourne to the Gulf of Carpentaria, following the track taken by the ill-fated Burke and Wills Expedition. Now you can follow them too. Following Burke

and Wills Across Australia guides you on a road trip that follows one of history's great transcontinental journeys, sharing the explorers' experiences on the way. Maps lay out a route that takes you as close as possible to the Expedition's track. As you travel the outback roads, you can learn all the details of the day to day journey of the Expedition from the explorers' own words, and compare what you see with their descriptions of the country in 1860-61. Each chapter provides information about what to see now: the location and descriptions of the markers and memorials placed along the route over the 150 years since the Expedition, and places where you can stand where the explorers stood and look out over prospects they drew and described. The book is a perfect companion for those wanting to see outback Australia, and at the same time understand a journey that has attained mythic status in the history of Australian exploration. Even if you want to follow only part of the track, this is the book for you. Dave Hahn, a local of Taos, New Mexico, is a legendary figure in mountaineering. Elite members of the climbing community have likened him to the Michael Jordan, Cal Ripkin, or Michael Phelps of the climbing world. The 2015 expedition he would lead came just one short year after the notorious Khumbu Icefall avalanche claimed the lives of sixteen Sherpas. Dave and his team—Sherpa sirdar Chhering Dorjee, assistant guide JJ Justman, base-camp manager Mark Tucker, and the eight clients who had trained for the privilege to attempt to summit with Dave Hahn spent weeks honing the techniques that would help keep them alive through the Icefall and the Death Zone. None of this could have prepared them for the earthquake that shook Everest and all of their lives on the morning of April 25, 2015. Shook tells their story of resilience, nerve, and survival on the deadliest day on Everest. What does it take for a regular guy to climb some of the highest mountains in the world? Five Big Mountains takes you there, instantly placing the reader and the author on a steep glacier on Pico de Orizaba with equipment trouble and the tough decision any high altitude climber inevitably faces—should he turn back or keep going to the summit? The central theme of the book is that with proper preparation, careful

planning, persistent training, and the best guides, even an amateur with little mountaineering experience can climb and reach the summits of some of the most famous mountains in the world, though there are risks involved that need to be minimized. Written in the first person, *Five Big Mountains* takes the reader into the mind of a regular guy trying to reach the summit of four of the famous Seven Summits, as well as his first high-altitude climb of a steep, glaciated Mexican volcano. The book tells what climbing is really like, the struggles and the triumphs, the emotions and the dangers, moment by moment. The reader is taken to Russia, Africa, Antarctica, South America, and Mexico. Along the way, the reader is able to travel with and discover the local flavor of each exotic or not so exotic venue. Color photos help the reader to visualize the glorious majesty of the peaks, but the narrative provides the nitty-gritty of the author's daily challenges on the mountains. *Navigation in the Mountains - The Definitive Guide for Hill Walkers, Mountaineers & Leaders* is the official navigation book for all Mountain Training schemes. Packed with essential information and techniques, this handbook is split into sections including: all aspects of mountain navigation; the additional techniques required in winter; adaptations in navigation techniques for use overseas; the use of GPS; digital mapping; and the teaching of navigation. This book is the reference tool for all walkers who wish to maintain or improve their navigation techniques as well as containing specific ideas for anyone wanting to help teach and lead others. Its functional design with easy reference colour coded pages, striking illustrations that complement the text and inspiring photographs make this book an indispensable guide. It is the fourth in a series of manuals and has been written and compiled by Carlo Forte, the Chief Instructor at the National Mountain Centre, Plas y Brenin, and it is published by Mountain Training UK. From skilled weekend warriors to internationally recognized stars of the professional adventure game, Lynn Martel has interviewed dozens of the most dynamic, creative and accomplished self-propelled adventurers of our time. In *Expedition to the Edge: Stories of Worldwide Adventure*, Martel has assembled 59 compelling

and entertaining stories that uniquely capture the exploits, the hardships, the fears and the personal insights of a virtual who's who of contemporary adventurers as they explore remote mountain landscapes from the Rockies to Pakistan to Antarctica. Through candid and revealing conversations, Martel captures the joys, the motivations and the revelations of top climbers Sonnie Trotter, Sean Isaac, Raphael Slawinski and Steph Davis; Himalayan alpinists Carlos Buhler, Marko Prezelj and Barry Blanchard; record-setting paraglider Will Gadd; Everest skier Kit Deslauriers; the conservationist duo Karsten Heuer and Leanne Allison as they follow a caribou herd for five months on foot across the Yukon; and Colin Angus on his two-year quest to become the first person to circumnavigate the world by human power. *Guidebook to walking the high mountains of Crete* with its dramatic gorges and numerous peaks rising to over 2100m, high mountain plains, forested crags, massive cliffs and remote beaches. In addition to many walks and trekking routes in the White Mountains, this new edition covers Mount Ida and the Lassithi Mountains. In May 1993 the British Mountaineering Council met to discuss the future of high altitude tourism. Of concern to attendees were reports of queues on Everest and reference was made to mountaineer Peter Boardman calling Everest an 'amphitheater of the ego'. Issues raised included environmental and social responsibility and regulations to minimize impacts. In the years that have followed there has been a surge of interest in climbing Everest, with one day in 2012 seeing 234 climbers reach the summit. Participation in mountaineering tourism has surely escalated beyond the imagination of those who attended the meeting 20 years ago. This book provides a critical and comprehensive analysis of all pertinent aspects and issues related to the development and the management of the growth area of mountaineering tourism. By doing so it explores the meaning of adventure and special reference to mountain-based adventure, the delivering of adventure experience and adventure learning and education. It further introduces examples of settings (alpine environments) where a general management framework could be applied as a baseline approach in mountaineering tourism

development. Along with this general management framework, the book draws evidence from case studies derived from various mountaineering tourism development contexts worldwide, to highlight the diversity and uniqueness of management approaches, policies and practices. Written by leading academics from a range of disciplinary backgrounds, this insightful book will provide students, researchers and academics with a better understanding of the unique aspects of tourism management and development of this growing form of adventure tourism across the world. Chic Scott covers all aspects of the sport, ranging from the ski jumpers at Rossland in the 1890s to the birth of ski lodges and ski resorts to the heliskiers, loppet racers and snowboarders of today. On January 20, 2003, at 10:45 a.m., a massive avalanche released from Tumbledown Mountain in the Selkirk Range of British Columbia. Tonnes of snow carried 13 members of two guided backcountry skiing groups down the 37-degree incline of a run called La Traviata and buried them. After a frantic hour of digging by remaining group members, an unthinkable outcome became reality. Seven people were dead. The tragedy made international news, splashing photos of the seven dead Canadian and US skiers on television screens and the pages of newspapers. The official analysis did not specifically note guide error as a contributing factor in the accident. This interpretation has been insufficient for some of the victims' families, the public and some members of the guiding community. Why did the guiding team seemingly ignore a particularly troublesome snowpack? Why were two groups travelling so close together? Were the guides adhering to best practices for terrain selection and snow stability evaluation? What motivated them to go there? Buried is the assistant guide's story. It renders an answerable truth about what happened by delving deep into the human factors that played into putting people in harm's way. The story begins buried metres deep in snow, and through care-filled reflection emerges slowly like spring after a long winter, nurturing a hopeful, courageous dialogue for all who make journeys through the mountains of their life. The story illustrates the peace that comes from accountability and the growth that results from

understanding. An expanded edition of the definitive guide to name origins in the White Mountains of New England. The description for this book, Hindu Javanese: Tengger Tradition and Islam, will be forthcoming. The official instructional guide for rock climbers. A reference tool for those who wish to climb, instruct, coach and lead. This Book Explores The Tourism Aspects Of The `Mountains Of India` In General And Provides Useable Information On Their Geography, Pilgrimage Centres, Hill Stations And Adventure Options Available To An Individual. Mountain rescue in western Canada developed through the Canadian Pacific Railway's use of Swiss guides to enhance the climbing experience in the early 1900s. These guides brought their knowledge of mountain rescue to the Canadian Rockies. As climbing gained in popularity with the emerging middle classes after the Second

World War, tragic accidents became more common. Two accidents in 1954-55 (the deaths of a group of female climbers from Mexico on Mt. Victoria and a group of Philadelphia schoolboys on Mt. Temple) forced the government to develop a professional mountain rescue team through the Park Warden Service under the tutelage of Walter Perren (a Swiss guide and the father of mountain rescue in Canada). Perren essentially turned cowboys into competent rescue personnel, and the story takes off from there. Following five principal men through the first 50 years of mountain rescue in Canada, Guardians of the Peaks also looks at all aspects of the rescue experience. It is the story of personal tragedy and the ability of individuals to cope with this stress-laced, demanding occupation.
