A provocative study of opposition to anti-Semitism in contemporary political philosophy. In post-Holocaust philosophy, anti-Semitism has come to be seen as a paradigmatic political and ideological evil. *Jews Out of the Question* examines the role that opposition to anti-Semitism has played in shaping contemporary political philosophy. Elad Lapidot argues that post-Holocaust philosophy identifies the fundamental, epistemological evil of anti-Semitic thought not in thinking against Jews, but in thinking of Jews. In other words, what philosophy denounces as anti-Semitic is the figure of "the Jew" in thought. Lapidot reveals how, paradoxically, opposition to anti-Semitism has generated a rejection of Jewish thought in post-Holocaust philosophy. Through critical readings of political philosophers such as Adorno, Horkheimer, Sartre, Arendt, Badiou, and Nancy, the book contends that by rejecting Jewish thought, the opposition to anti-Semitism comes dangerously close to anti-Semitism itself, and at work in this rejection, is a problematic understanding of the relations between politics and thought—a troubling political epistemology. Lapidot's critique of this political epistemology is the book's ultimate aim. Elad Lapidot is Assistant Professor of Philosophy at the University of Bern in Switzerland. He is coeditor (with Micha Brumlik) of *Heidegger and Jewish Thought: Difficult Others*.

A follow-on to the highly successful Prayer for the Day Volume I, this second volume brings together 365 selected readings from the much-loved, long-running series on BBC Radio 4. The programme, which has been broadcast daily at 5:43am for several decades, and continues to attract over half a million dedicated listeners, comprises a short 2-minute reflection to start your day. These artfully combine traditional forms of prayer and reflection, from a variety of religions and denominations, with contemporary issues and themes that are often relevant to the date on which the programme is broadcast. In keeping with the theme of 'Prayer for the Day', there are 365 reflections in the book, from a vast range of the eminent religious figures and broadcasters who have contributed to the programme over the years. There will be a foreword by a prominent figure in the faith community, a short profile of each contributor and an index of contributors. To emphasise the point that the reflections can be used daily, they are ordered by date (i.e. 1st January, 2nd January etc), and each entry is selected on the basis of it being as date-specific as possible. The date of broadcast is underneath each entry, and dates are also marked at the top corners of each page so they can be found easily. The spacious design includes page openers for each month with simple line illustrations. Prayer for the Day Volume II is a beautiful and inspirational addition to any bedside table, with religious meditations that both participate in the ecumenical spirit of the 21st century and equip you perfectly for each day's journey.

Copyright law is a critical issue for authors, librarians, publishers, and information vendors. It is also a complex area, with many shades of gray. Librarians continually need to seek answers to questions ranging from the reproduction of copyrighted works for library users, through the performance of audiovisual works, to the digitization and display of protected works on library websites. This book presents updated versions of the author's copyright columns published in *Against the Grain*, the leading journal in acquisitions librarianship since the late 1990s. It is the first volume in the series *Charleston Insights in Library, Archival, and Information Sciences*. The aim of the *Charleston Insights* series is to focus on important topics in library and information science, presenting the issues in a relatively jargon-free way that is accessible to all types of information professionals, including librarians, publishers, and vendors, and this goal shapes the pragmatic and accessible tone of the book. The volume is presented in question-and-answer format. The questions are real, submitted by librarians, educators, and other information professionals who have attended the author's copyright law workshops and presentations or submitted them to her by e-mail or telephone. The author has selected the questions and answers that have general applicability. She has then arranged them into logical chapters, each prefaced by a short introduction to the topic. Because it is written in an accessible and clear style, readers may want to review the entire work or they can just access particular chapters or even specific questions as they need them. The volume includes an index to facilitate reference use. This volume of essays on Christian doctrine was the product of an attempt to provide scholarship representative of Cambridge theology in the early twentieth-century. Edited by the great H.B. Swete, the volume presents essays by such noted scholars as F.R. Tennant, William Cunningham, William Barnes, F.J. Foakes-Jackson, and J.F. Bethune-Baker.

Questionnaires are widely used in the social sciences and very often survey data form the basis for governmental and commercial planning or evaluation. Yet the quality of survey data is not attested to, since a large variety of factors in the language-use situation prove to influence the answers unintentionally. The forbid/allow asymmetry is a well-known example of this: when respondents are asked whether something should be forbidden, about 50% may answer 'yes, forbid' – whereas an equivalent question phrased with the verb 'to allow' could well cause up to 75% of the respondents to answer 'no, it should not be allowed'. Which question wording is preferable to measure respondents' true attitudes? Only when we know why the answers differ, can we decide on that. This book is the first to apply a systematic cognitive approach to describe the causes of the forbid/allow asymmetry. The question-answering process is unravelled by a variety of experiments and meta-analytic techniques. Analyses reveal that the difference in question wording does not prompt respondents to retrieve different attitudes. Instead, the asymmetry reflects that the question wording causes the response options to be used differently. Because of the qualifying dimensions in the question text, the meanings of 'yes' and 'no' change, as well as the cognitive distance between them. This study sheds a different light on processes of question-answering and text interpretation. Furthermore, practical advice on questionnaire design and on the interpretation of survey data is given on the basis of these new insights. Sanders combs the Scripture to learn about the Christian's final home: 'So incredibly glorious is heaven that we are compelled to express

it in...symbols of grandeur and majesty.' Considers (81) H.R. 5748, (81) H.R. 5895.

For everyone who's curious about what's new under (and over and around) the stars. Douglas Adams famously pronounced in *The Hitchhiker's Guide to the Galaxy* that the answer to life, the universe, and everything was 42. Quirks & Quarks, whose approach to science owes almost as much to Adams as it does to Newton or Einstein or Hawking, have flipped that notion through a gap in the space-time continuum (or something like that) and come up with answers to the 42 essential questions about space. Much about the universe is very hard for most of us to grasp, and if anyone can explain these mind-bending aspects of the heavens above, it's the Quirks & Quarks producers, who have been bringing Canadians understandable science, with trademark humour, for more than thirty years. In their *Guide to Space*, they answer such pressing questions as Where does space begin? Why is most of the universe missing? Is there intelligent life in the universe? And the real puzzler: What came before the Big Bang? They also answer questions we wish we'd thought to ask, such as Can you surf a gravity wave? and Why is the universe's temperature on my TV? There are answers as well to far more practical questions, like What happens when you fall into a black hole? and How will the universe end? The answers, which have been vetted by a team of astronomers, are witty, authoritative, in-depth, accurate, up-to-date astronomically, and, of course, quirky.
