This timely book offers a comprehensive study of the mechanism that gives effect to foreign bank resolution actions. In particular, it focuses on how the legal framework for the recognition of foreign bank resolution actions should be structured and proposes detailed legal principles on which effective frameworks should be based. The Single Resolution Board (SRB) will be responsible for the resolution of banks in the euro area from 1 January 2016. However, the resources of the Single Resolution Fund (SRF) at the disposal of the SRB will only gradually be built up until 2023. This paper provides estimates of the potential financing needs of the SRF, based on the euro area bank resolutions that actually occurred between 2007 and 2014. We find that the SRF would have been asked to put a total amount of about €72 billion into these failing banks, which is more than the target for the SRF (€55 billion) but less than the amount the SRF could draw on, if the ex post levies are also taken into account. As this sum would have been required over eight years the broad conclusion is that bridge financing, in addition to the existing alternative funding, would only have been needed in the early years of the transition. Issue for 1946/47 includes a summary of the organization's activities from its inception to July 1, 1947. Discussing the legal mechanisms available in the EU and the United States to deal with banks and other financial institutions that are in financial distress, this book analyses the impact of the Bank Recovery and Resolution Directive looking at implementation in the UK and Germany, and uses US law as a comparative reference point.
