***This book is of interest to mathematics  
educators, researchers in mathematics  
education, gender, social justice, equity and  
democracy in education; and  
practitioners/teachers interested in the use of  
project work in mathematics teaching and  
learning. The book builds theoretical ideas from  
a careful substantial description of practice, in  
the attempt to improve both theory and practice  
in mathematics education. It thus interrogates  
and develops theoretical research tools for  
mathematics education and provides ideas for***

*practice in mathematics classrooms. This book is a thorough, balanced, and insightful study of the present status and future direction of health care economics and its far-reaching ramifications. Eastaugh provides exhaustive analyses of such major issues as: cost behavior and cost functions; economic models and physician behavior; cost sharing, managed care, and competition health plans; equity, access and the urban medical center; consumer education, service quality and health manpower; efficiency and cost-benefit; and future policy trends. It is designed to provide the tools necessary to balance issues of efficiency and quality. In this companion volume to their anthology Working Classics, Nicholas Coles and Peter Oresick present poems written in the 1980s and 1990s that address the nature and culture of nonindustrial work---white collar, domestic, clerical, technical, managerial, or professional. They cross lines of status, class, and gender and range from mopping floors to television news reporting, Wall Street brokerage, and raising children. Policing for a New South Africa evaluates the options for change in South African policing. It analyses orthodox policing ideas imported from the West and contrasts them with indigenous models of independent policing in the*

***townships themselves. The world is aging at a great speed. While this is a remarkable achievement, aging also brings new challenges, among them a growing need for long-term care. 'Caring for a Living' specifically investigates Italy's employment of home eldercare assistance, an arrangement whereby long term care services are bought in the market in the form of private and individualized assistance - predominantly female immigrants. Capacity building for the power sector is an important national responsibility, which Governments in Africa need to seriously address. The inability of Governments to mobilize the required level of investment and commitment to the development and retention of a wide array of skills needed by the power sector is, in part, responsible for many of the difficulties that are faced by the region's electricity industry. Under the aegis of the AFREPREN Capacity Building Theme Group, a regional study and four country studies (Zimbabwe, Mauritius, Ethiopia and South Africa) addressed the capacity building question in the African power sector. This volume presents the findings of the studies. The studies analyse issues of manpower recruitment, training and retention in national power utilities. They also***

***highlight the challenges and implications of capacity building initiatives in a reforming electricity industry and propose innovative options for capacity building in the region's power sector. Gameboys, grunge, Friends, and The Fresh Prince--growing up in the 1990s was rad. So why not take yourself back to a time when the Spice Girls were topping the charts and Push Pops were being eaten by the thousands, to discover if you really are a true child of the 1990s! Brings together for the first time what we know and what we need to know about the state of early childhood, univ.-level teacher prep. in the U.S. Fulfills 3 purposes: examines the nature and content of current early childhood prof'l. prep. programs at the pre-service level; provides a comprehensive description of what constitutes high quality early childhood prof'l. prep., and most important; drives prof'l. discussion concerning the future of prof'l. prep. at the baccalaureate level in early childhood educ. Provides critiques of contemporary practice and offers challenges for the field in preparing the next generation of early childhood educators. Rejecting cries of gloom and doom, Hope for a Heated Planet shows how the fight against global warming can be won by the grassroots efforts of***

***individuals. Robert K. Musil, who led the Nobel Peace Prize-winning organization Physicians for Social Responsibility, explains that a growing new climate movement can produce unprecedented change-in the economy, public health, and home-while saving the planet. Musil draws on personal experience and compelling data in this practical and rigorous analysis of the causes and cures for global warming. The book presents all the players in the most pressing challenge facing society today, from the massive fossil fuel lobby to the enlightened corporations that are joining the movement to "go green." Musil thoroughly explains the tremendous potential of renewable energy sources-wind, solar, and biofuel-and the startling conclusions of experts who say society can do away entirely with fossil fuels. He tells readers about the engaged politicians, activists, religious groups, and students who are already working together against climate change. But the future depends, Musil insists, on what changes ordinary citizens make. Through personal choices and political engagement, he shows how readers can cut carbon emissions and create green communities where they live. With practical and realistic solutions, Hope for a Heated Planet inspires***

***readers to be accountable and enables them to usher in an age of sustainability for future generations. EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine. Includes proceedings that cover 84 papers, presented at the 'Remote Sensing for a Changing Europe' symposium held in Istanbul, Turkey (2-5 June 2008). Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world. Combining both the theory as well as the practice of the education reform process, this unique breakthrough volume focuses on every aspect of the change process in high school education today. Short- and long-term strategies***

*for each phase of the process-provoking, creating, managing, supporting, and sustaining reform-are covered. Based on the real-life experiences of the author and others, this book recognizes that most high school reform is short-lived. It stresses the ways to create and maintain positive change, making the process a long-lasting, worthwhile mission for the school's leadership and ultimately the students. Short, useful summaries of high school reform provide true-life pictures of what really happens in the midst of changing the way educational institutions operate. These stories cover school-based management, collaborative or shared leadership, school-within-a-school groupings, interdisciplinary instruction, school-based budgeting, new models for professional development, and others. Through these examples, readers can understand how reform strategies work and how to apply and adapt them to their own situations. As an added feature, this book provides the names and locations of schools attempting each reform as well as the names and addresses of school reform networks that readers can contact in their own efforts. This book is the first systematic attempt to document statutory building control in Hong Kong. It examines 40*

***cases decided by the Building Appeal Board with reference to the overlapping jurisdictions of the Buildings, Lands and Planning authorities in controlling building development. The cases are categorized under nine major themes, namely 'procedures and principles', 'immediate neighbourhood', 'widths of streets', 'lanes', 'access and parking', 'stepped streets', 'means of escape', 'illegal structures and enforcement orders' and 'demolition'. Each case is examined in detail, cross-referenced and illustrated by drawings and photographs where appropriate. For each category, a list of relevant law cases and a summary of the decision criteria identified are also provided. This work should be of great value to Authorized Persons, surveyors, lawyers and town planners who practise in Hong Kong, as well as those who are interested in the policies and issues concerning building control in a high-rise and high density living environment. It should also help professional practitioners prepare for the relevant APC examinations for the Hong Kong Institute of Surveyors and other professional organizations. More Americans now identify as political independents than as either Democrats or Republicans. Tired of the two-party gridlock, the pandering, and the lack of vision,***

*they've turned in increasing numbers to independent and third-party candidates. In 1998, for the first time in decades, a third-party candidate who was not a refugee from one of the two major parties, Jesse Ventura, won election to state-wide office, as the governor of Minnesota. In 2000, the public was riveted by the Reform Party's implosion over Patrick Buchanan's presidential candidacy and by Ralph Nader's Green Party run, which infuriated many Democrats but energized hundreds of thousands of disaffected voters in stadium-sized super-rallies. What are the prospects for new third-party efforts? Combining the close-in, personal reporting and learned analysis one can only get by covering this beat for years, Micah L. Sifry's *Spoiling for a Fight* exposes both the unfair obstacles and the viable opportunities facing today's leading independent parties. Third-party candidates continue to be denied a fighting chance by discriminatory ballot access, unequal campaign financing, winner-take-all races, and derisive media coverage. Yet, after years of grassroots organizing, third parties are making major inroads. At the local level, efforts like Chicago's New Party and New York's Working Families Party have upset urban political*

***machines while gaining positions on county councils and school boards. Third-party activists are true believers in democracy, and if America's closed two-party system is ever to be reformed, it will be thanks to their efforts***

***'Agricultural Management in India'*** Is an edited volume on Indian agriculture having a collection of 27 papers contributed by the distinguished scholars and the scientists. It is a thematic study involving the diagnostic as well as the prognostic aspects of Indian agriculture with a view to project its complex nature and indentify the quarters of future change. In order to facilitate analytical reading the book divides itself into six sections. The provides statistical, analytical and scientific information in regard of agricultural practices of India. It is hoped that it will prove immensely useful for the researchers, intellectuals and policy makers and a milestone in the treatises on Indian Agriculture. The potential for early intervention to prevent social problems later in life has become the focus of much debate in recent years and finds itself at the centre of contemporary social policy. The meaning of 'vulnerability' - one of the key concepts in this drive - is examined in this book, as well as the relationship between vulnerability and the

***individual, communities and society. This book introduces students to a broad debate around what constitutes vulnerability and related concepts such as risk and resilience, and examines how vulnerability has been conceptualised by policy makers with a clear focus on early intervention. Adopting a case study approach, it opens with chapters examining the concept of vulnerability from sociological, psychological and social policy perspectives before looking at examples around disability, homelessness, leaving care, victims of violence, sexual abuse, prison, the Internet and drug use. Supporting students in engaging with and evaluating the conceptualisation and application of vulnerability in professional practice, this book is suitable for anyone either preparing for or currently working within the children's workforce, from social work and health care to education and youth work. This paper discusses basic principles underlying budget law and reviews key features of budget legislation in several OECD countries as a basis for development of budget legislation in economies in transition to a market environment (EITs). It recommends a broad structure and a number of specific provisions that could be included in***

***budget law for EITs. An examination of the CEO selection process notes the power that corporate CEOs hold in making news and impacting the economy, describing a trend towards charismatic CEOs who have impressive media credentials but who may ultimately be incompatible with their company's needs. (Business & Finance) When drought and depression hit southwestern Kansas, thousands fled the region. But, surprisingly, more than three-quarters of the population stayed. Examining the social impact of economic hardship and environmental disaster, Pamela Riney-Kehrberg illustrates how both farm and town families survived by finding odd jobs, working in government programs, or depending on federal and private assistance. Those years of deprivation, she shows, dramatically affected standards of living, family relationships, city and county finances, land ownership, farm prices and production, population shifts, and politics - and indelibly altered the outlook and future plans of these Kansans. More important, her study provides a moving testament to the endurance and fortitude of these remarkable people. Concrete technology for a sustainable development in the 21st century focuses on the problems and challenges for the concrete***

***industry today and in the future with particular emphasis on environmental consciousness. Primary topics include: the improvement of concrete's service life to ease technical and economical problems and the waste of natural resources; environmentally friendly concrete production including new production methods and recycling materials; and actually using concrete to solve environmental problems, for example through the containment of hazardous waste. The book is the result of the international workshop held in Lofoton, Norway. With very select contributions from the most distinguished international professional experts, this book provides a basic framework and guidelines for national and international bodies. After the multi-racial elections in April 1994, South Africa has been set on a new course. For a country emerging from 45 years of apartheid democracy should prove to be the vital first step on the path to sustainability and equitability. There are sure to be pitfalls along the way but the potential offered by long-awaited equality is enormous, and realising that potential is the key to the country's chances of achieving sustainable development. This book analyses the changes which are needed and which might result from***

***the new political culture. It discusses the policy requirements necessary for sustainable development and looks at how the economy, regional integration, land reform, the law, local government, NGOs, health care and AIDs prevention, education, and the media will all be affected, drawing on the experience of other countries in Africa which have witnessed the transition to black majority rule. Accessible to general readers as well as to specialists, it provides a comprehensive overview of the issues involved, and a basis for understanding what prospects the future holds for South Africa. A radical new look at the religious, economic, and political roots of terracide and how things can change for the better.***
