The Twelfth Child is a novel about trust, love and friendship. Set in the Shenandoah Valley of Virginia, this story starts in early 1900's and takes readers on a journey of mystery, adventure and discovery as young Abigail Anne Lannigan struggles to unearth the woman she is destined to become. This middle grade, magical-realism novel from the author of The Flourishing of Floralie Laurel is about an Irish girl who is sent to a mysterious town in Virginia to live with her long-lost mother, and is Alice Hoffman's Nightbird meets Claire LeGrand's The Cavendish Home for Boys and Girls! Amidst the 1971 Troubles between the Irish Republican Army and Northern Ireland, twelve-year-old Finn lives in a world of her own of fairy tales. Raised by her grandmother, Nuala, who is the village storyteller, Finn spends her days playing make-believe in the forest, weaving tall tales to tell her friend Darcy, longing to go to the island of Inis Eala to meet the swans there, and waiting for her father to return from the war. She's long since stopped believing in happy endings and miracles, preferring to believe instead in serendipity, or "happy mistakes." While Nuala revels in the safety and routine of their quiet village life, spunky Finn craves adventure . . . something that comes to her more quickly than expected. When Darcy becomes lost at sea and Nuala suddenly passes away, Finn is shipped off to the affluent town of Starlight Valley, Virginia, to live with her long-lost mother, Aoife, and half-sister, Posy-Kate. Finn is initially excited to get to know her newfound family, but she can't help but notice that things are a bit unusual. The town is encircled by thorn trees, and even stranger is Aoife's house, where the walls are covered with swan feathers and decorated with swan heads--and Aoife's shoes appear to be made out of swan bills. Finn tries to ignore the sinking feeling that something isn't right, but she starts to believe that what's happening isn't random. Instead, it's taken directly from one of her grandmother's famous folktales, The Children of Lir, where a scorned mother turns all of her children into swans. But Finn stopped believing in those stories a long time ago . . . could they actually be true? In this revolutionary book, a renowned computer scientist explains the importance of teaching children the basics of computing and how it can prepare them to succeed in the ever-evolving tech world. Computers have completely changed the way we teach children. We have Mindstorms to thank for that. In this book, pioneering computer scientist Seymour Papert uses the invention of LOGO, the first child-friendly programming language, to make the case for the value of teaching children with computers. Papert argues that children are more than capable of mastering computers, and that teaching computational processes like de-bugging in the classroom can change the way we learn everything else. He also shows that schools saturated with technology can actually improve socialization and interaction among students and between students and teachers. Technology changes every day, but the basic ways that computers can help us learn remain. For thousands of teachers and parents who have sought creative ways to help children learn with computers, Mindstorms is their bible. The 1st ed. includes an index to v. 28-36 of St. Nicholas.
