Internationaler Motorenkongress 2014 Oct 19 2019 Bis nachhaltige technische und wirtschaftliche Lösungen für den Elektroantrieb gefunden sind, behält der Verbrennungsmotor seine dominierende Stellung als Antriebsquelle für Pkw und Nutzfahrzeuge. In den nächsten Jahrzehnten kommt dem klassischen Motor damit weiterhin die Rolle des Schrittmachers für CO₂-arme Mobilität zu. Um die ambitionierten Umweltziele zu erreichen, müssen alle Komponenten, Systeme und Funktionen des Motors weiter optimiert und an die immer komplexeren Anforderungen im Gesamtsystem angepasst werden. Vor dem Hintergrund dieser Entwicklungsaufgaben veranstaltet ATZlive und das VDI Wissensforum erstmals gemeinsam den Internationalenen Motorenkongress.

Proceedings of the 4th International Conference on Industrial Engineering Feb 03 2021 This book highlights recent findings in industrial, manufacturing and mechanical engineering, and provides an overview of the state of the art in these fields, mainly in Russia and Eastern Europe. A broad range of topics and issues in modern engineering are discussed, including the dynamics of machines and working processes, friction, wear and lubrication in machines, surface transport and technological machines, manufacturing engineering of industrial facilities, materials engineering, metallurgy, control systems and their industrial applications, industrial mechatronics, automation and robotics. The book gathers selected papers presented at the 4th International Conference on Industrial Engineering (ICIE), held in Moscow, Russia in May 2018. The authors are experts in various fields of engineering, and all papers have been carefully reviewed. Given its scope, the book will be of interest to a wide readership, including

mechanical and production engineers, lecturers in engineering disciplines, and engineering graduates.
