Lindeman, a musicologist, traces and defines the historical development of the concerto form as it passed from Mozart to succeeding generations. He then assesses Beethoven's contributions, and examines the classical model of the form in the early 19th century by overviewing several early romantic composers' works. Subsequent chapters analyze and assess the responses of five precursors of Schumann, whose work offers a synthesis of radical experiments and traditional tenets. He concludes by suggesting that concertos of Liszt offer a road into further developments of the genre in the second half of the century. Concerto in C Major for the Pianoforte Aug 17 2022 Mozart's piano concertos speak with their own voice much more than his symphonies, operas or church and chamber music. In this genre, the composer-performer appears on stage as the ideal musician. The composer speaks to us with the voice of music, expressing our thoughts and feelings in ways that we cannot achieve. The strength of this voice is traditionally attributed to the elements of the theme and harmony, Mozart's use of a unique and, in a sense, invented form. The fact is that all Mozart's concerts are different from each other, and their strength and the way they influence us depends not only on the theme and harmony but perhaps above all on the character and sound.

Clarinet Concerto in C Minor, Op. 36 Nov 20 2022 The early years of the nineteenth century saw wide-ranging developments to the mechanics and acoustics of the Classical clarinet. The Russian virtuoso clarinetist, composer, and instrument designer Iwan Müller brought about some of the most important innovations in clarinet design. His "clarinet omnitonique," a thirteen-keyed instrument, was radical in that it would be able to play comfortably in all tonalities, dispensing with the need for the family of clarinets pitched in different keys. For a prototype of this "nouvelle clarinet" a collaboration between Müller and the noted Viennese maker, Johann Merklein—the German composer Philipp Jakob Riotte (1776–1856) wrote a virtuosic concerto. This premiered in Vienna in the autumn of 1809. Published in 1818, and previously thought to be lost, Riotte's op. 36 for the prototype "clarinet omnitonique" displays a diverse palette of keys, extreme registral contrasts, and chromatic writing for clarinet, which were clearly facets of Müller's playing enabled by his new instrument. The work enhances our understanding of the development and deployment of the
