Developments in Surface Contamination and Cleaning, Volume 4 Mar 04 2021 In this series Rajiv Kohli and Kash Mittal have brought together the work of experts from different industry sectors and backgrounds to provide a state-of-the-art survey and best-practice guidance for scientists and engineers engaged in surface cleaning or handling the consequences of surface contamination. The expert contributions in this volume cover important fundamental aspects of surface contamination that are key to understanding the behavior of specific types of contaminants. This understanding is essential to develop preventative and mitigation methods for contamination control. The coverage complements the treatment of surface contamination in vol.1, Fundamental and Applied Aspects. This volume covers: Sources and Generation of Particles; Manipulation Techniques for Particles on Surfaces; Particle Deposition and Rebound; Particle Behavior in Liquid Systems; Biological and Metallic Contamination; and includes a comprehensive list of current standards and resources. Comprehensive coverage of innovations in surface contamination and cleaning Written by established experts in the contamination and cleaning field Each chapter is a comprehensive review of the state of the art Case studies included

System Programmer's Guide to Z/OS System Logger Apr 05 2021 The z/OS System Logger is a function provided by the operating system to exploiters running on z/OS. The number of exploiters of this component is increasing, as is its importance in relation to system performance and availability. This IBM Redbooks document provides system programmers with a solid understanding of the System Logger component and guidance about how it should be set up for optimum performance with each of the exploiters. System Logger is an MVS component that provides a logging facility for applications running in a single-system or multi-system sysplex. The advantage of using System Logger is that the responsibility for tasks such as saving the log data (with the requested persistence), retrieving the data (potentially from any system in the sysplex), archiving the data, and expiring the data is removed from the creator of the log records. In addition, Logger provides the ability to have a single, merged, log, containing log data from multiple instances of an application within the sysplex.

Global outlook on climate services in agriculture Oct 11 2021 Climate change and extreme weather events are heightening levels of acute food insecurity and food crises around the world. As the world emerges from the COVID-19 pandemic and deals with other drivers of food security, poverty and inequality, the international community is calling for a climate-resilient and sustainable recovery. Supporting the shift away from disaster response toward preventative and anticipatory action is fundamental to address the growing challenges faced by agriculture and food systems. Climate services highlight the role of science and technology in providing innovative solutions for risk reduction, effective resilience policies and adaptation planning. Underpinned by robust science and agrometeorological data, climate services and digital advisories bring tailored climate information to agricultural producers and value chain actors. But despite increasing evidence of the benefits of climate services, there are still major gaps in their development worldwide. This global assessment points to a significant gap in investment in climate services for the last mile – the small-scale farmers and most marginalized communities. Bridging this gap and scaling climate services is essential if actionable information is to be communicated in an equitable and effective manner to users, making sure no one is left behind. The report presents the latest data on the state of climate services for agricultural users with surveys from 36 countries across all FAO regions. The report's findings have major implications for institutional frameworks to effectively target investments in resilience, preparedness and recovery. Case studies highlight additional challenges, opportunities and lessons learned from specific interventions across the climate services provision framework. Despite many challenges, climate services have demonstrable benefits to agriculture and food security by navigating agricultural producers around unpredictable and changing weather patterns. The report presents a blueprint for targeted investments to ensure that finance is effectively allocated not only to enhance the production of climate services, but also their provision, engagement and application by agricultural communities.

Beyond Rosie the Riveter Oct 31 2020 The iconic bicep-flexing poster image of "Rosie the Riveter" has long conveyed the impression that women were welcomed into the World War II work force and admired for helping "free a man to fight." Donna Knaff, however, shows that "Rosie" only revealed part of the reality and that women depicted in other World War II visual art—both in the private sector and the military—reflected decidedly mixed feelings about the status of women within American society. *Beyond Rosie the Riveter* takes readers back to a time before television's dominance, to the golden age of print art and its singular power over public opinion. Focusing specifically on instances of "female masculinity" when women entered previously all-male fields, Knaff places these images within the context of popular discussions of gender roles and examines their historical, cultural, and textual contexts. As Knaff reveals, visual messages received by women through war posters, magazine cartoons, comic strips, and ads may have acknowledged their importance to the war effort but also cautioned them against taking too many liberties or losing their femininity. Her study examines the subtle and not-so-subtle cultural battles that played out in these popular images, opening a new window on American women's experience. Some images implicitly argued that women should maintain their femininity despite adopting masculinity for the war effort; others dealt with society's deep-seated fear that masculinized women might feminize men; and many reflected the dilemma that a woman was both encouraged to express and suppress her sexuality so that she might be perceived as neither promiscuous nor lesbian. From these cases, Knaff draws a common theme: while being outwardly empowered or celebrated for their wartime contributions, women were kept in check by being held responsible for everything from distracting male co-workers to compromising machinery with their long hair and jewelry. Knaff also notes the subtle distinctions among the images: government war posters targeted blue-collar women, *New Yorker* content was aimed at socialites, *Collier's* addressed middle-class women, and *Wonder Woman* was geared to young girls. Especially through its focus on visual arts, Knaff's book gives us a new look at American society decades before the modern women's rights movement, torn between wartime needs and antiquated gender roles. It provides much-needed nuance to a glossed-over chapter in our history, charting the difficult negotiations that granted—and ultimately took back—American women's wartime freedoms.

DSCA Handbook Aug 09 2021 This two-in-one resource includes the Tactical Commanders and Staff Toolkit plus the Liaison Officer Toolkit. Defense Support of Civil Authorities (DSCA) enables tactical level Commanders and their Staffs to properly plan and execute assigned DSCA missions for all hazard operations, excluding Chemical,

Biological, Radiological, Nuclear, high yield Explosives (CBRNE) or acts of terrorism. Applies to all United States military forces, including Department of Defense (DOD) components (Active and Reserve forces and National Guard when in Federal Status). This hand-on resource also may be useful information for local and state first responders. Chapter 1 contains background information relative to Defense Support of Civil Authorities (DSCA) including legal, doctrinal, and policy issues. Chapter 2 provides an overview of the incident management processes including National Response Framework (NRF), National Incident Management Systems (NIMS), and Incident Command System (ICS) as well as Department of Homeland Security (DHS). Chapter 3 discusses the civilian and military responses to natural disaster. Chapter 4 provides a brief overview of Joint Operation Planning Process and mission analysis. Chapter 5 covers Defense Support of Civilian Authorities (DSCA) planning factors for response to all hazard events. Chapter 6 is review of safety and operational composite risk management processes Chapters 7-11 contain Concepts of Operation (CONOPS) and details five natural hazards/disasters and the pertinent planning factors for each within the scope of DSCA.

Run-to-Run Control in Semiconductor Manufacturing Feb 03 2021 Run-to-run (R2R) control is cutting-edge technology that allows modification of a product recipe between machine "runs," thereby minimizing process drift, shift, and variability-and with them, costs. Its effectiveness has been demonstrated in a variety of processes, such as vapor phase epitaxy, lithography, and chemical mechanical planarization. The only barrier to the semiconductor industry's widespread adoption of this highly effective process control is a lack of understanding of the technology. Run to Run Control in Semiconductor Manufacturing overcomes that barrier by offering in-depth analyses of R2R control.

War Psychiatry Jan 22 2020 This volume of the Textbook of Military Medicine addresses the delivery of mental health services during wartime. The foreseeable future of the U.S. military includes the potential for involvement in a variety of conflicts, ranging from peace-keeping missions to massive deployments of personnel and materiel and possible nuclear, biological, and chemical threats as was seen in the Persian Gulf War. The medical role in wartime is critical to success of the mission. For the mental health disciplines, this role encompasses identification and

elimination of unfit personnel, improvement of marginal personnel to standards of acceptability, prevention of psychiatric casualties, and their treatment when prevention fails. All of these efforts must be guided by past experience and sound principles of human behavior.
