"Observing the Sun" is for amateur astronomers at all three levels: beginning, intermediate, and advanced. The beginning observer is often trying to find a niche or define a specific interest in his hobby, and the content of this book will spark that interest in solar observing because of the focus on the dynamics of the Sun. Intermediate and advanced observers will find the book invaluable in identifying features (through photos, charts, diagrams) in a logical, orderly fashion and then guiding the observer to interpret the observations. Because the Sun is a dynamic celestial body in constant flux, astronomers rarely know for certain what awaits them at the eyepiece. All features of the Sun are transient and sometimes rather fleeting. Given the number of features and the complex life cycles of some, it can be a challenging hobby. "Observing the Sun" provides essential illustrations, charts, and diagrams that depict the forms and life cycles of the numerous features visible on the Sun. The Yearbook is the 60th issue in a series of annual compilations of internationally comparable statistics summarizing world energy trends. Annual data for 230 countries and areas for the period 2013 to 2016 are presented on production, trade and consumption of energy: solids, liquids, gaseous fuels, electricity and heat, covering both renewable and non-renewable sources of energy. In addition, per capita consumption series are provided for all energy products. Graphs are included to illustrate historic trends and/or changes in composition of production and/or consumption of major energy products, along with special tables. Initially developed as a tool for training lead auditors of nuclear quality systems, the Nuclear Auditing Handbook has also been used as a reference by quality managers who plan quality system audits. It provides detailed material in such aspects as the development, administration, planning, preparation, performance, and reporting of quality system audits in energy-related fields. ASQ's Nuclear Committee of the Energy and Environment Division gathered a team of highly seasoned experts in the nuclear auditing field to expand this new edition's content and bring it current to modern-day best practices and standards. This book introduces updated information about requirements and standards, including the 2019 editions of the American Society of Mechanical Engineers (ASME) NQA-1 Quality Assurance Program Requirements for Nuclear Facility Applications and ASME BPVC Sections I; IV; and VIII, Divisions 1 and 2. The authors and editors have also added helpful tools to aid nuclear auditors, including case studies suitable for training auditors, blank forms for convenient use, and samples of completed forms. This annual publication produced by the United Nations Office on Drugs and Crime provides up-to-date and comprehensive statistics as well as assessments of annual medical and scientific requirements concerning psychotropic substances; the various levels of consumption of groups of the substances, and also the prohibitions and restrictions relative to their export and import. This trilingual publication contains the English, French and Spanish versions. The International Monetary Fund's Executive Board regularly reviews progress and developments under the Data Standards Initiatives. The last review—Eighth Review—undertaken in February 2012 introduced the Special Data Dissemination Standard (SDDS) Plus. In light of the long experience under the Data Standards Initiatives established in the mid-1990s, this review takes a longer term retrospective on what has been achieved so far, and highlights some of the lessons learned. What is evident is the contrast between the progress of countries with more advanced dissemination practices (SDDS and SDDS Plus), and the slow pace of improvement under the General Data Dissemination System (GDDS). Since 2012, Somalia has been recovering slowly from nearly 25 years of civil war. Weak institutional capacity, complex clan politics, and a challenging security situation have complicated economic reconstruction. As a result, social and economic conditions remain dire. To help Somalia's economic reconstruction efforts and establish a policy implementation track record as an important step toward an eventual fund arrangement, the authorities have requested an IMF staff-monitored program. It focuses on strengthening macroeconomic policy management and reforms to strengthen economic governance and institutional capacity and keep up the pace of restoring key economic and financial institutions.
